

KIEL  SCHOOL

Gifted and Talented Student Options

“It is common for fifth grade classrooms in Wisconsin to have more than seven grade levels of academic readiness present.”

_Wisconsin Association for Gifted & Talented, Moving Wisconsin Students Forward, 2020.

Educational experts agree that exceptional students, (and in particular, twice-exceptional, often called “2E students”) are often not getting the academically challenging focus they deserve. Giftedness presents in many ways; some students who are gifted are not easily identified, often because of other behavioral, neuro-diverse, linguistic or even socio-economic exceptionalities.

The Problem: Meeting the needs of gifted and twice-exceptional learners

The Solution: individualized plans for accelerated and differentiated learning with support for all learners!

Acceleration has a very high impact on student achievement, an impact greater than concept mapping, enrichment, parental involvement, or teacher professional development.

Kiel Virtual Schools can offer specific subject acceleration for students for a fraction of the cost, while also providing flexible scheduling so students can remain with their age appropriate peers.
