

Kiel Area School District
Annual Asbestos Notification
(2016-2017)

The federal law AHERA (Asbestos Hazard Emergency Response Act) requires all primary and secondary schools to develop and implement a plan for managing all building materials which contain asbestos. Included in AHERA are the requirements to notify all workers and building occupants, or their legal guardians, at least once each year about inspections, periodic surveillance and asbestos removal or repair activities.

In 1988, all buildings owned by the School District were inspected by EPA accredited inspectors. Based on the inspection, the District prepared and the State approved a comprehensive management plan for administering the asbestos.

The District has accomplished the following mandates regarding the administration of asbestos this past year.

- Environmental Management Consulting, Inc. (EMC) has been contracted to be the Districts certified asbestos consultant for the school year.
- The District has an Operations and Maintenance program in place that ensures asbestos materials are kept in good condition.
- Periodic surveillance has been completed every 6 months by our consultant.
- The District's most recent 3 year re-inspection was in October 2013 and is scheduled again for October 2016
- The District had no removal activities performed within the past school year.

Short term workers (outside contractors) must be provided information regarding the location of asbestos in which they may come into contact. All short term workers shall contact the Designated Person before commencing work.

A copy of the Asbestos Management Plan is available for review by contacting the District Office. All questions regarding the Asbestos Management Plan should be directed to the Districts Designated Person Mr. Ben Hill, Director of Building & Grounds at 920-894-2266
